PRICES OF GLADIOLUS BULBS SEASON 1923

THE GLADIOLUS

Most people know that the Gladioli of today are greatly improved over their parents of thirty years ago; yet few fully realize the great improvements in larger size of blooms, the greater number of blooms on a spike, more blooms open at a time, the greater diversity of markings and the delicate shades of the Gladioli of today.

Although not a specialist in the growing of Gladioli they have a place on my list of favorite garden flowers. From the earliest of the garden flowers of Springtime until the approach of winter there are flowers in bloom in my garden and all lovers of these Smiles of Nature are welcome to visit my gardens and share with me their beauty.

I have new seedlings of my own production in Gladioli, Irises, Oriental Poppies and Peonies. Primevere is regarded as the brightest yellow peony in commerce, but I have a seedling that I have not yet offered to the trade, that is a brighter yellow than Primevere.

Returning to the subject of the Gladiolus anybody who can grow a hill of corn can grow a Gladiolus. I plant the bulbs in rows three feet apart. I furrow out the rows about five inches deep for the blooming bulbs and place the bulbs 4 to 6 inches apart in the rows according to small to largest of blooming bulbs and cover even with the surface. If kept well cultivated and free from weeds success is certain. Plantings may be made from early in April until July 1st. I usually make but one planting May 1st to 10th. By planting the earliest to latest varieties, blooms may be had for a period of two to three months from a single planting. In the fall before freezing weather lift the bulbs and allow them to dry off, cut off the stalks and store in a cool dry place. After 3 to 6 weeks remove the old dead bulb from the bottom of the new and your new bulbs are ready for the next season’s planting.

I always have many varieties in my experimental plot that are not listed. Following is a list with prices of varieties for sale delivered to you. Twelve at ten times the price of one.

...
Prices of Gladiolus Bulbs Season 1923.
